SDS Review

Project name: HelpApp
Reviewer: shmilove
Reviewer project: Grosharies

Introduction

The SDS file organized well and easy to read.

Classes diagrams & CRC cards

The class diagrams are very objective, easy to read and understand.
In the CRC cards I did not understand who is the collaborator for each responsibility it's not specific.

Sequence Diagram

Very good, the diagram represents the sequence in an understandable why.

Persistence

The data base diagram is clear and easy to understand.

Nonfunctional request

The nonfunctional table is very clear and easy to understand.

Risk management

The risk management table covers up understandable risks and a good way to try and deal with them. But the table is not easy to read.

User manual

Very helpful for the user to understand the site. Nice job.
I would like to see some questions and answers, it will help for the user.

Conclusion

Very good job the document have all the details to understand the project, and the why it's going to work. Best of luck to you HelpApp.
